What Is a Ledger?

The ledger is the principal book of accounts where all the financial transactions are summarized and categorized into various accounts. It provides a comprehensive view of the financial position of a business by consolidating data from subsidiary books like the cash book, sales book, purchase book, etc.

Ledger Accounts and Their Significance

Each account within the ledger is known as a ledger account or T-account. These accounts help in:

Link Between Cash Book and Ledger Accounts

- Crediting the cash account for cash paid.
