Understanding Smart Phrases in Epic

What Are Smart Phrases?

Smart phrases are customizable, shorthand text snippets used within Epic's note-writing environment. They function as templates or shortcuts that expand into predefined, often complex, text blocks with minimal effort. This feature allows clinicians to insert standardized information swiftly, reducing repetitive typing and minimizing errors.

For example, a clinician might create a smart phrase like:

`` .meds `` ? "Current Medications: [List of medications], allergies: [allergy info], last updated: [date]."

When typed into a note, `` .meds `` expands into the full text, saving time and ensuring consistency across documentation.

The Role of Smart Phrases in Medication Documentation

Specifically for medication documentation, smart phrases serve multiple purposes:

- Standardization: Ensuring consistent recording of medication lists, allergies, adverse reactions, and instructions.
- Efficiency: Reducing time spent typing repetitive medication info.
- Accuracy: Minimizing typographical errors and omissions.
- Compliance: Facilitating documentation that aligns with institutional protocols or regulatory requirements.

Creating and Managing Smart Phrases for Medications in Epic

Best Practices for Developing Effective Smart Phrases

Creating effective smart phrases requires thoughtful planning. Here are key best practices:

- Clarity and Specificity: Ensure the phrase clearly conveys its purpose. For example, `` .meds `` for current medications, `` .allergy `` for allergy info.
- Standardization: Develop institution-wide or department-specific templates to promote uniformity.
- Modularity: Break complex information into smaller, reusable snippets for flexibility.
- Use of Placeholders: Incorporate variables or prompts (e.g., `` [Medication Name] ``, `` [Dose] ``, `` [Frequency] ``) to customize entries quickly.
- Testing: Before widespread deployment, test smart phrases to ensure they expand correctly and display as intended.
- Documentation: Maintain a repository with descriptions and purposes for each smart phrase for user reference.

Steps for Creating Smart Phrases in Epic

While the exact steps may vary depending on your Epic configuration, the general process involves:

- Access SmartPhrase Editor: Usually through the "SmartTools" menu or administrative interface.
- Define the Phrase Name: Use a logical and memorable identifier, such as `.MEDLIST``.
- Input the Content: Enter the text or template, including placeholders for dynamic data.
- Assign to Users or Roles: Decide if the phrase is available to individual clinicians or a broader group.
- Save and Test: Confirm the expansion works as intended within clinical notes.

Example of a Medication Smart Phrase:

...

`.medication_summary`

Current Medications:

- [Medication 1], [Dose], [Frequency], [Route]
- [Medication 2], [Dose], [Frequency], [Route]

Allergies:

- [Allergy Name], [Reaction]

Last Updated: [Date]

...
