Commonly Tested Concepts and How to Approach Them

Differentiating Between Taxonomic Ranks

Questions often ask students to identify or compare different levels of classification.

Tip: Pay attention to the defining features at each level, such as broad traits in Kingdoms versus specific traits in Species.

Interpreting Phylogenetic Trees

Questions may present a tree and ask which organisms are most closely related or to identify common ancestors.

Approach: Focus on shared nodes and derived traits; understand what the branching points signify.

Applying Classification to Real-world Scenarios

Be prepared to analyze new organisms or genetic data and classify them accordingly.

Sample Questions and Answers for Practice
