## Sample Questions and Model Answers

To illustrate, here are some representative questions with detailed explanations:

### Question 1: Which of the following materials is considered friable asbestos?

- a) Vinyl flooring
- b) Spray-applied insulation
- c) Cement pipes
- d) Asphalt shingles

Correct Answer: b) Spray-applied insulation

Explanation: Friable asbestos materials are those easily crumbled or reduced to powder by hand pressure. Spray-on insulation is a classic example of friable ACM, posing higher inhalation risks if disturbed. Cement pipes and vinyl flooring typically contain non-friable asbestos, which is less likely to release fibers unless damaged.

### Question 2: According to OSHA regulations, what is the minimum respiratory protection level required during asbestos abatement activities?

- a) Dust mask (NIOSH N95)
- b) Half-face elastomeric respirator with HEPA filters
- c) Full-face positive-pressure supplied-air respirator
- d) Surgical mask

Correct Answer: c) Full-face positive-pressure supplied-air respirator

Explanation: OSHA mandates the use of high-level respiratory protection, such as supplied-air respirators, during asbestos removal, especially in high-risk situations. N95 masks are inadequate for asbestos due to their limited filtration capacity. Full-face respirators with HEPA filters are also acceptable but may be insufficient without positive-pressure systems in high-exposure scenarios.

### **Question 3: In the event of accidental disturbance of asbestos-containing material, what is the immediate action to take?**

- a) Continue work and monitor the area
- b) Stop work immediately, evacuate the area, and inform the supervisor
- c) Cover the disturbed area with plastic sheeting and proceed
- d) Dust the area to settle fibers

Correct Answer: b) Stop work immediately, evacuate the area, and inform the supervisor

Explanation: Disturbing ACM can release hazardous fibers. Immediate evacuation and notification ensure that proper containment, cleanup, and assessment can occur, minimizing exposure risk.
