Explanation:

This answer emphasizes communication, safety checks, and site awareness?key aspects of the role. A signaller acts as the eyes and ears of the operation, ensuring safety and precision.

Question 2: Which hand signal indicates 'stop' to the crane operator?

Answer:

Raising one arm vertically with the palm facing outward (palm open), held steady above the head, signals the crane to stop.

Explanation:

This is a standardized signal used universally. Knowing and correctly interpreting such signals prevents miscommunication during lifts.

Question 3: What are the key safety checks to perform before starting a lifting operation?

Answer:

Key safety checks include:
